

A CHILD'S WORLD

PROJECT OVERVIEW

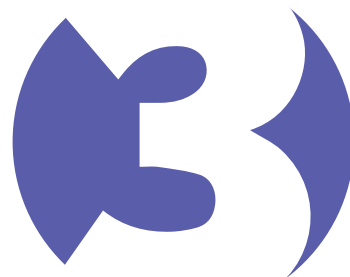

Leadership Niagara collaborated with A Child's World to investigate, implement and provide insight on a new electronic scheduling system. Prior to the project, ACW had a manual process for finding fill-in and support staff at 23 daycare centres in six municipalities across Niagara. Together, ACW and LN were able to find a software solution from an existing IT partner that benefited the agency by providing a more streamlined workforce planning experience for its 90+ full-time and part-time staff.
